## **Silikal Floors: Safe and easy for the automotive sector**

**Extremely durable, easy to care for, monolithic and installed literally “overnight.”  
All the best signs for safe operations point to reactive resin floors from Silikal in  
workshops, showrooms, manufacturing and storage areas.**

# Get in and

Reactive resin floors from Silikal are truly a stress-free way to reach your destination.

The daily routine in the automotive industry: tightening screws, greasing, mounting, painting, welding. It smells like gasoline, oils, paints and burned brake linings. It is engines, machines and tools that set the tone around here. And all this simply has to be put on a firm footing. Floors with that special drive about them come from Silikal.

For automobile manufacturers, at automobile repair shops, in showrooms and at accessory manufacturers, both for new buildings and for renovations: Silikal floors on a reactive resin base are the perfect solution. Robust and easy-care, they are the ideal floor for car parks and garages as well, but also for warehouses and offices. A safe and clean solution everywhere you need them.

## Durable and easy-care

Aggressive media such as motor oils or fuels, greases or lye have no chance to seep into Silikal reactive resin floors. Everything can be removed from the non-porous surface quickly and thoroughly. And when the floor meets the wall, it can be made to form a basin to catch liquids. Safe and secure, right down the line.

# drive away!

ation ... a quick, easy and attractive floor for your automotive plant or workshop.

Proven in the field  
For over 55 years  
On many million m<sup>2</sup>

Constant car and forklift traffic, falling tools or heavy machinery that could scratch the floor? No problem with Silikal flooring. It is resistant to wear and tear, abrasion and pressures up to 100 N/mm<sup>2</sup> and more. And anti-skid grades mean safety due to the variety of grain materials spread over the surface and then sealed into it.

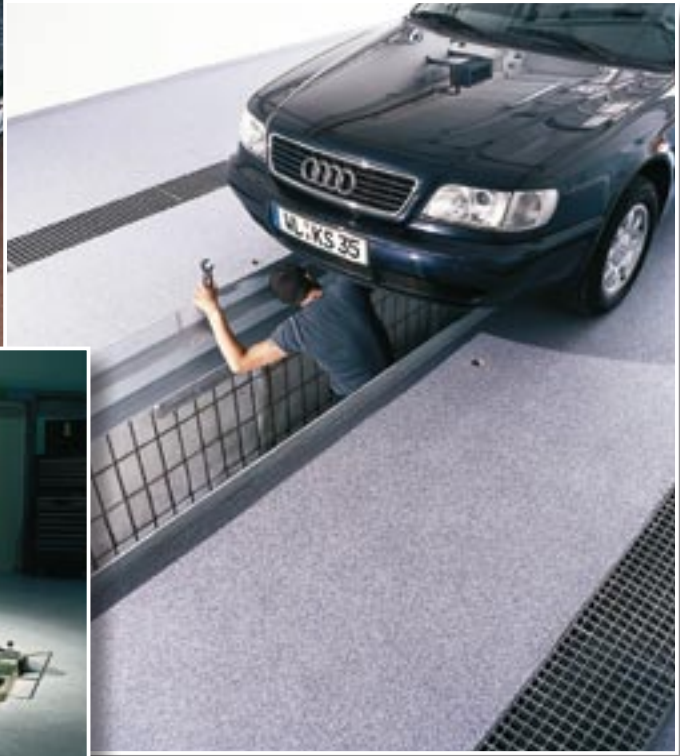

## Service overnight

Repairs and renovations in manufacturing or operations without expensive downtimes are just another part of the Silikal service. Reactive resins cure in only one to two hours and can then bear their full load. New floors are created "overnight".

## Looking good

Work goes better on a beautiful floor! Our Colour Concept gives you attractive alternatives. Floors can be made in the company colours or just to match your personal tastes, in a granite look, with coloured chips or your company logo built right in. Just rev it up and off you go!

**Your call—Silikal!  
An overview of the advantages.**
